PB Innovations 2005

Dear Reader

You can rely on our power of innovation: we have developed in close cooperation with professionals and do-it-yourselfer new products for you.

Each novelty was created in response to a special customer concern. This way we constantly adapt our range to meet the needs of our countless international customers. With PB Baumann quality tools, you can always be sure of successfully carrying out your demanding jobs.

Both today and in the future, the name of PB Baumann stands for hand tools of the highest quality and for outstanding customer service. You can put your full trust in tools from PB Baumann!

In this PB Newsletter, we would like to draw your attention to our new products and to our PB summer promotion. We look forward to providing you with this special service.

Marc Blunier
Marketing manager

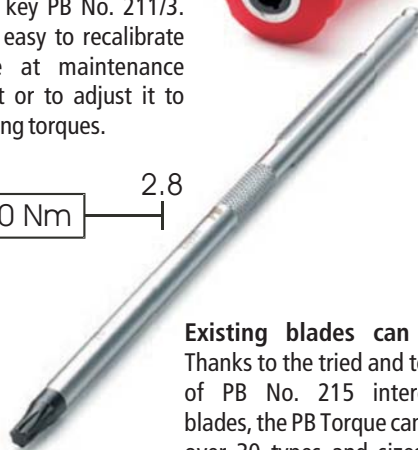

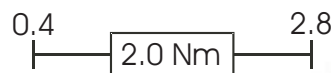

PB Torque[®]

EN ISO 6789

Thanks to its pleasant grip and resistance to chemicals, the PB Torque with SwissGrip design is ideal for jobs requiring maximum ergonomics and quality. It combines the reliable release mechanism of a torque device with the good grip and handiness of a standard PB SwissGrip screwdriver.

Individual tightening torque: The PB torque handles can be adjusted with a long hex key PB No. 211/3. This means it is easy to recalibrate the PB Torque at maintenance intervals you set or to adjust it to different tightening torques.

Ultra accurate: PB torque tools have a preset torque when delivered by PB Baumann (+/- 6%, test conducted in accordance with EN ISO 6789). A test certificate is enclosed with each tool to confirm the exact value.

Ergonomic performance: The special PB mechanism allows an ultra-small triggering angle for ergonomic performance.

Release torque: +100%

Existing blades can be used:

Thanks to the tried and tested range of PB No. 215 interchangeable blades, the PB Torque can be used on over 30 types and sizes of screws (new also for Torx Plus screws)! The new handle accommodates all the interchangeable blades for the following handles: PB 215A, PB 7215A and PB 8215A.

PB New products 2005

PB interchangeable blades

... for Torx Plus® screws (PB 215 TXP)

We have launched these new interchangeable blades in response to industry's growing demand for tools for Torx Plus screws. Combined with the PB torque handle, they are particularly effective, especially in cutting operations.

... with magnetic bit mount (PB 215 M)

With this new bit mount, you can use all C6 bits in existing PB interchangeable handles and in the new PB torque handle.

... for Torx® screws (PB 215 T/6 and T/7)

These sizes fill out the bottom part of the range for PB torque handle.

Set of offset screwdrivers (PB 410 H/6-25)

This new set supplements the existing holder 410 H 7 - 25 with the common size T6 and replaces it in the PB range.

Available in the colors red, green, yellow and blue

PB file handles (PB 1200)

The optimized design of our reliable file handles features the following improvements:

- Textured surface for superb grip in oily work environments
- Cross-bore hole at end of handle for easy hanging
- Costs about 10% less than the old version thanks to the use of the latest production technology.
- No need for threads or other aids: Simply knock the file into the handle without a hammer. The non-slip material assures that the file remains firmly and securely in place

Numerous other new products:

Together with the products presented in this Newsletter, you find many further novelties in the catalogue 2005, e.g. the PB crowbar PB 830, new SwissGrip and ElectroTool models, various extensions of the product range, etc.

PB Catalogue 2005

The PB catalogue for 2005 gives you information on new products, standard items and sales promotion measures. You find the whole product range classified according to product group. On 82 pages, the PB tool range and the most important features are introduced to you in a clear way.

Ask your local dealer for the new PB catalogue 2005. In addition, the catalogue is at your disposal also as PDF download on www.pbtools.ch.
